

UNITED STATES DEPARTMENT OF AGRICULTURE  
FARM SECURITY ADMINISTRATION

Form RA-FC 2-7, "Project Identification Alphabetical by State"

FARM SECURITY ADMINISTRATION PROJECT REGISTER  
Listing all Active and Inactive Projects as of November 1, 1937

Explanation

In order to distinguish active from inactive projects, the titles of ACTIVE projects are given in capital letters.

Administrative jurisdiction of the Land Utilization Program was transferred to the Bureau of Agricultural Economics by the Secretary's Memorandum No. 733 September 1, 1937. However, the funds made available for this program through June 30, 1938 will remain with the Farm Security Administration, since that agency has been designated to continue the functions necessary to bring the program financed with present funds appropriated or allocated therefor to the point where a final accounting may be rendered. Hence the Land Utilization projects have been retained in this register.

The Register also includes projects which have been transferred to the National Park Service, the Office of Indian Affairs, and other agencies. Outside of the National Park Service projects (all of which are active and whose titles are consequently given in capital letters) no attempt is made to indicate the status of projects for which the Farm Security Administration no longer has any responsibility.

Land purchased by the Farm Security Administration in connection with the migratory waterfowl projects automatically goes under the jurisdiction of the Bureau of Biological Survey as soon as title is cleared. (Exceptions to this statement include land purchased for LB-LA 3, LB-LA 4, and LB-TN 3, although the President is expected to sign executive orders placing these projects in the same category as the others.) Due to the progress of title clearance, all the migratory waterfowl projects, except those indicated, are either in whole or in part under the jurisdiction of the Bureau of Biological Survey.

Special attention is called to the "Headquarters" column. The term headquarters properly applies only to active projects. A "Headquarters" given for an inactive project is merely a nearby city.

Additional Copies of Form RA-FC 2-7

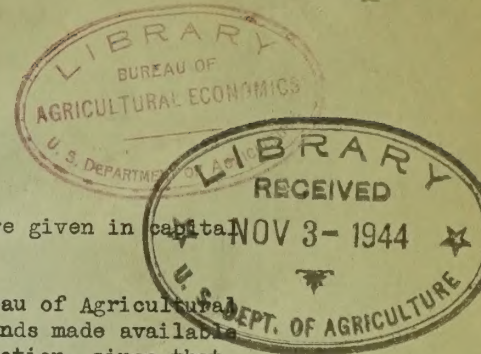

Form RA-FC 2-7 is issued by the Budget Section of Finance and Control Division. For additional copies, communicate with the Distribution Unit of the Business Management Division (Branch 494, Farm Security Administration Exchange).

Supplements

Supplements to this issue of Form RA-FC 2-7 will be prepared and distributed, if and when required, to all parties on the regular mailing list.

State Corporation and FSA Cooperative Registers

There will shortly be issued a State Corporation project register and an FSA cooperative register, both of which should be appended hereto. These registers will give cross reference to the related FSA project number, if any.

THE HISTORY OF THE  
CITY OF BOSTON

1630

1630

The first settlement in Boston was made in 1630 by a group of Puritan settlers from England. They arrived on the ship *Arcturion* and established the town of Boston. The settlers were led by John Winthrop, who gave the famous "City upon a Hill" speech. The town was founded on the principles of religious freedom and self-government. Over the years, Boston grew into a major center of commerce and industry. It was the site of the American Revolution and the birthplace of many important figures in American history. The city has a rich cultural heritage and is known for its education, science, and industry. Today, Boston is a vibrant city with a mix of old and new, offering a unique experience for visitors and residents alike.

"Project Identification Alphabetical by State"  
LISTING ALL REGISTERED FSA ACTIVE AND INACTIVE PROJECTS

## INDIANA, Region 3

[illegible]

1/ This page revised to show combination under FSA funds of RR-IN 11 with RR-IN 10, Wabash Farms, approved by the President Nov. 26, 1937; the number RR-IN 11 is cancelled. All FSA funds allotted to RR-IN 11 will be transferred to RR-IN 10. The two projects will not be combined under Corporation Trust Funds; consequently Trust Funds previously allotted to S-IN 2, Valley Farms, will not be transferred.

(1)

(2)

(3)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The document also notes that this practice is a key component of good financial management and is required by law in many jurisdictions.

2. The second part of the document describes the various methods used to collect and analyze data. It includes a detailed discussion of the different types of data that can be collected, such as sales data, customer data, and employee data. It also explains how this data can be used to identify trends, make predictions, and improve business performance. The document provides a step-by-step guide to the data collection process, from identifying the data sources to analyzing the results.

3. The third part of the document focuses on the importance of data security and privacy. It discusses the various risks associated with data breaches and the steps that can be taken to prevent them. It also explains the legal requirements for data protection and the importance of obtaining consent from individuals before collecting their data. The document provides a checklist of the key security measures that should be implemented to protect data.

4. The fourth part of the document discusses the importance of data quality and the steps that can be taken to ensure it. It explains that data quality is essential for making accurate decisions and for maintaining the integrity of the data. It provides a checklist of the key factors that can affect data quality, such as data entry errors, missing data, and outdated data. The document also explains how to identify and correct data quality issues.

5. The fifth part of the document discusses the importance of data governance and the steps that can be taken to implement it. It explains that data governance is the process of managing data as an organization's most valuable asset. It provides a checklist of the key components of data governance, such as data ownership, data access, and data retention. The document also explains how to develop a data governance framework and how to implement it.

6. The sixth part of the document discusses the importance of data literacy and the steps that can be taken to improve it. It explains that data literacy is the ability to understand and use data effectively. It provides a checklist of the key skills that are needed for data literacy, such as data collection, data analysis, and data communication. The document also explains how to develop a data literacy program and how to implement it.

7. The seventh part of the document discusses the importance of data ethics and the steps that can be taken to ensure it. It explains that data ethics is the study of the moral principles that govern the use of data. It provides a checklist of the key ethical considerations that should be taken into account when using data, such as transparency, accountability, and fairness. The document also explains how to develop a data ethics framework and how to implement it.

8. The eighth part of the document discusses the importance of data innovation and the steps that can be taken to promote it. It explains that data innovation is the process of using data to create new products, services, and business models. It provides a checklist of the key factors that can affect data innovation, such as data availability, data quality, and data security. The document also explains how to develop a data innovation strategy and how to implement it.

9. The ninth part of the document discusses the importance of data collaboration and the steps that can be taken to promote it. It explains that data collaboration is the process of sharing data between different organizations or departments. It provides a checklist of the key factors that can affect data collaboration, such as data ownership, data access, and data security. The document also explains how to develop a data collaboration strategy and how to implement it.

10. The tenth part of the document discusses the importance of data transparency and the steps that can be taken to promote it. It explains that data transparency is the process of making data accessible and understandable to all stakeholders. It provides a checklist of the key factors that can affect data transparency, such as data availability, data quality, and data security. The document also explains how to develop a data transparency strategy and how to implement it.
